

# Quick and Easy Snack Baggie {reusable}

---

 [sewlicioushomedecor.com/quick-easy-snack-baggie-reusable/](http://sewlicioushomedecor.com/quick-easy-snack-baggie-reusable/)

*This is waterproof, food safe and reusable. It's great for lunches, sandwiches, and snacks on the go.*

*Best of all, it's super quick and super easy to sew!*

## Quick & Easy Snack Baggie

These cute little baggies are perfect for school lunches. They are so easy and quick to make, you can make several and have one for each day of the week!

They are food safe, waterproof, and re-usable. What more could you ask for in a lunch baggie?

The kind of fabric used is called [Eco-PUL](#) by [Diaper Sewing Supplies](#).

What is **Eco-PUL**, you ask? Here's a short description and you can read more about it [here](#).

*PUL fabric by Eco-PUL™ starts with lightweight polyester interlock (knit) fabric. The polyester interlock is paired with TPU (thermoplastic polyurethane), a thin stretchy plastic film. These two components are bonded together into a single fabric using a combination of heat, pressure, and adhesive.*

So to sum it up, it means that it's solvent-free, environmentally friendly, releases no volatile organics, machine washable and food safe!

You can read about their claim of being food safe [here](#).

I know you're just dying to make one so here's the super easy tutorial. If you're a beginner you can do this!

**BUT, before you put your fabric to the sewing machine you need to know how to sew Eco-PUL fabric. It's not like using regular fabric!**

- You don't need to pre-wash Eco-PUL.
- You don't want to pin your Eco-PUL fabric, instead use bobby pins or fabric clips to hold it in place.
- Use a ball point or knits needle
- Use polyester thread to prevent wicking
- Sew with the coated side against the feed dogs

Learn why these tips are important [here](#).

**What you will need:**

[Eco-Pul](#) fabric for the lining

Fabric for outside-either [Eco-Pul](#) or cotton

(Keep in mind [Eco-Pul](#) is waterproof)

Velcro-Iron on or sew on

Thread

**\*\*If you are using a regular cotton fabric along with your [Eco-PUL](#), be sure to prewash it!\*\***

But there's no need to pre-wash **Eco-PUL**.

To start, cut both pieces of fabric 16 x 8.

Cut one end in a half circle using a plate as your guide.

Isn't that cute?

Pin (with bobby pins or fabric clips) **right sides together** and sew all the way around leaving an opening to turn right side out.

Press with an iron.

Cut along the half circle for turning.

Turn right side out. No need to sew up the opening, we will do that when we sew the edges, next.

Fold the end about 3/4 from the top. Line up where your velcro will go and sew or iron on your velcro.

Next line up the edges, pin (with bobby pins or fabric clips for best results) and sew in place. I accidentally used pins the first time. lol

That's it! You can whip these out in 30 minutes or less, they are sew easy!
